

IN THE SPECIFICATION:

Please replace the paragraph starting on pg. 4, line 3 and ending on pg. 4, line 19 with the following:

Figure 1A depicts one embodiment of an information technology system 100 comprising a plurality of web server computer systems 102a and a plurality of pervasive computing devices 102b (only one web server 102a and device 102b shown in detail for clarity) interconnected by a communications medium 106. Each computer system 102 has one or more central processing units 110 ("CPU") connected to a main memory unit 112, a mass storage interface 114, a display interface 116, a network interface 118, and an input/output ("I/O") interface 120 by a system bus 122. The mass storage interfaces 114 connect the system busses 122 to one or more mass storage devices, such as a direct access storage device 140 and a readable and a writable optical disk drive 142. The network interfaces 116 allow the computer systems 102 to communicate with each other and to a plurality of other computers (not shown) over the communications medium 106. The main memory 112a in the web server computers 102a contains an operating system 124a, and a web server application 126a capable of servicing requests for web pages 128. Some of the web pages 128 contain a list of elements 129. The main memory 112b in the pervasive computing devices 102b contains an operating system 124b and a web browser 126b capable of requesting and rendering the web pages 128 from the web server computer 102a. The web browser 126 in this embodiment includes a summary information module 125 capable displaying summary information about the list of elements 129.
